## About Carr

### Table of Contents

CARR WAS ESTABLISHED IN 1946 to build the finest quality medical equipment. Based in Santa Monica California, it has prominent installations on all continents, including Antarctica. Its innovative imaging systems were even selected for the SR-71 and Apollo moon landing programs. Our design philosophy: "The greatest sophistication is simplicity" - Da Vinci.

# 7 Series Features

70 YEARS EXPERIENCE built into each and every cabinet manufactured.

MODERN APPEARANCE. The 7 Series compliments work space design with a clean, sophisticated look.

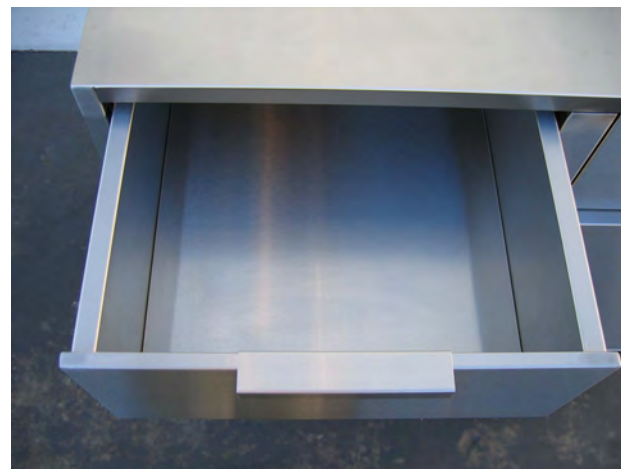

STAINLESS STEEL CONSTRUCTION is superior to other materials because it is inert, nontoxic, chemical resistant, non-absorbent, has an integral finish that does not chip or flake and is inherently durable. It is made of 85% recycled material, 100% recyclable.

DURABLE for institutional use. Double wall construction. Fully welded and reinforced body. Heavy duty hardware and drawer slides. Tempered glass. Hinges are full door height, not just two 3" high individual hinges.

COMPLETELY ENCLOSED BODY that includes tops and backs insures proper isolation of stored contents.

SMOOTH INTERIORS have flush shelf ladders and unobstructed surfaces making sterilization more effective.

# 7 Series Specifications

**DESIGN:** 7 Series Casework is designed for the unique requirements of medical and laboratory environments. It is intended to be highly durable for daily use yet feature a modern appearance. Cabinets meet all applicable industry standards such as MILSPEC.

**CONSTRUCTION:** Double wall construction throughout. Body structure consists of two outer panels formed into a pan with front bends creating the vertical channels. Onto this is welded a back panel with strengthening bends. Horizontal beams are welded cross the front between the outer body panels contributing to lateral stability. Onto this assembly is placed the outer top and bottom with horizontal channels which cover the horizontal beam. Into the interior sides is welded another pan panel with built-in shelf ladder perforations. Into the inner top and bottom are welded a pan section panel that create a flush interior with no dead spaces. Cabinet face is flush with no overlapping metal. The fully enclosed cabinet body is then sealed and caulked for complete moisture proofing.

# 7 Series Specifications

**STAINLESS STEEL** Type 304 # 4 finish.  
Body, doors 14 gauge (2 layers of .020).  
Back panel, hrz beams 18 gauge.  
Shelves, drawers, 20 gauge construction.

**DOORS** Double pan, 5/8" thick, sound insulated, doubler panel hinge support.

**DRAWERS** Welded with smooth interior.  
Two 100 Lbs capacity ball bearing slides.

**SHELVES** Pan construction, adjustable in .500" increments. Flush ladders in sides.

**HANDLES** 7" Wide stainless with nylon inserts, 4" centers, hidden interior screws.

**HINGES** Full height piano hinges, .170" thick SS, .100 dia. pin. Self lubricating.

**DOOR CATCHES** Two .25" dia. rollers, chrome plated spring steel receptacles.

**BASE** Removable, 3" deep toe space.

**GLASS** Tempered safety glass, .250" thick, clear seamed, removable, gasket.

**LOCKS** Optional. Replaceable cores, keyed same or different upon request.

carrcorporation.com - 9/14 - Page 5

A technical line drawing showing the front view of a stainless steel cabinet. The cabinet has a double-door design with a top glass panel. Below the glass is a large rectangular drawer. Underneath the drawer are three horizontal shelves. The cabinet is mounted on a base with a toe space. The drawing uses solid lines for the main structure and dashed lines to indicate hidden components like the back panel and internal supports.

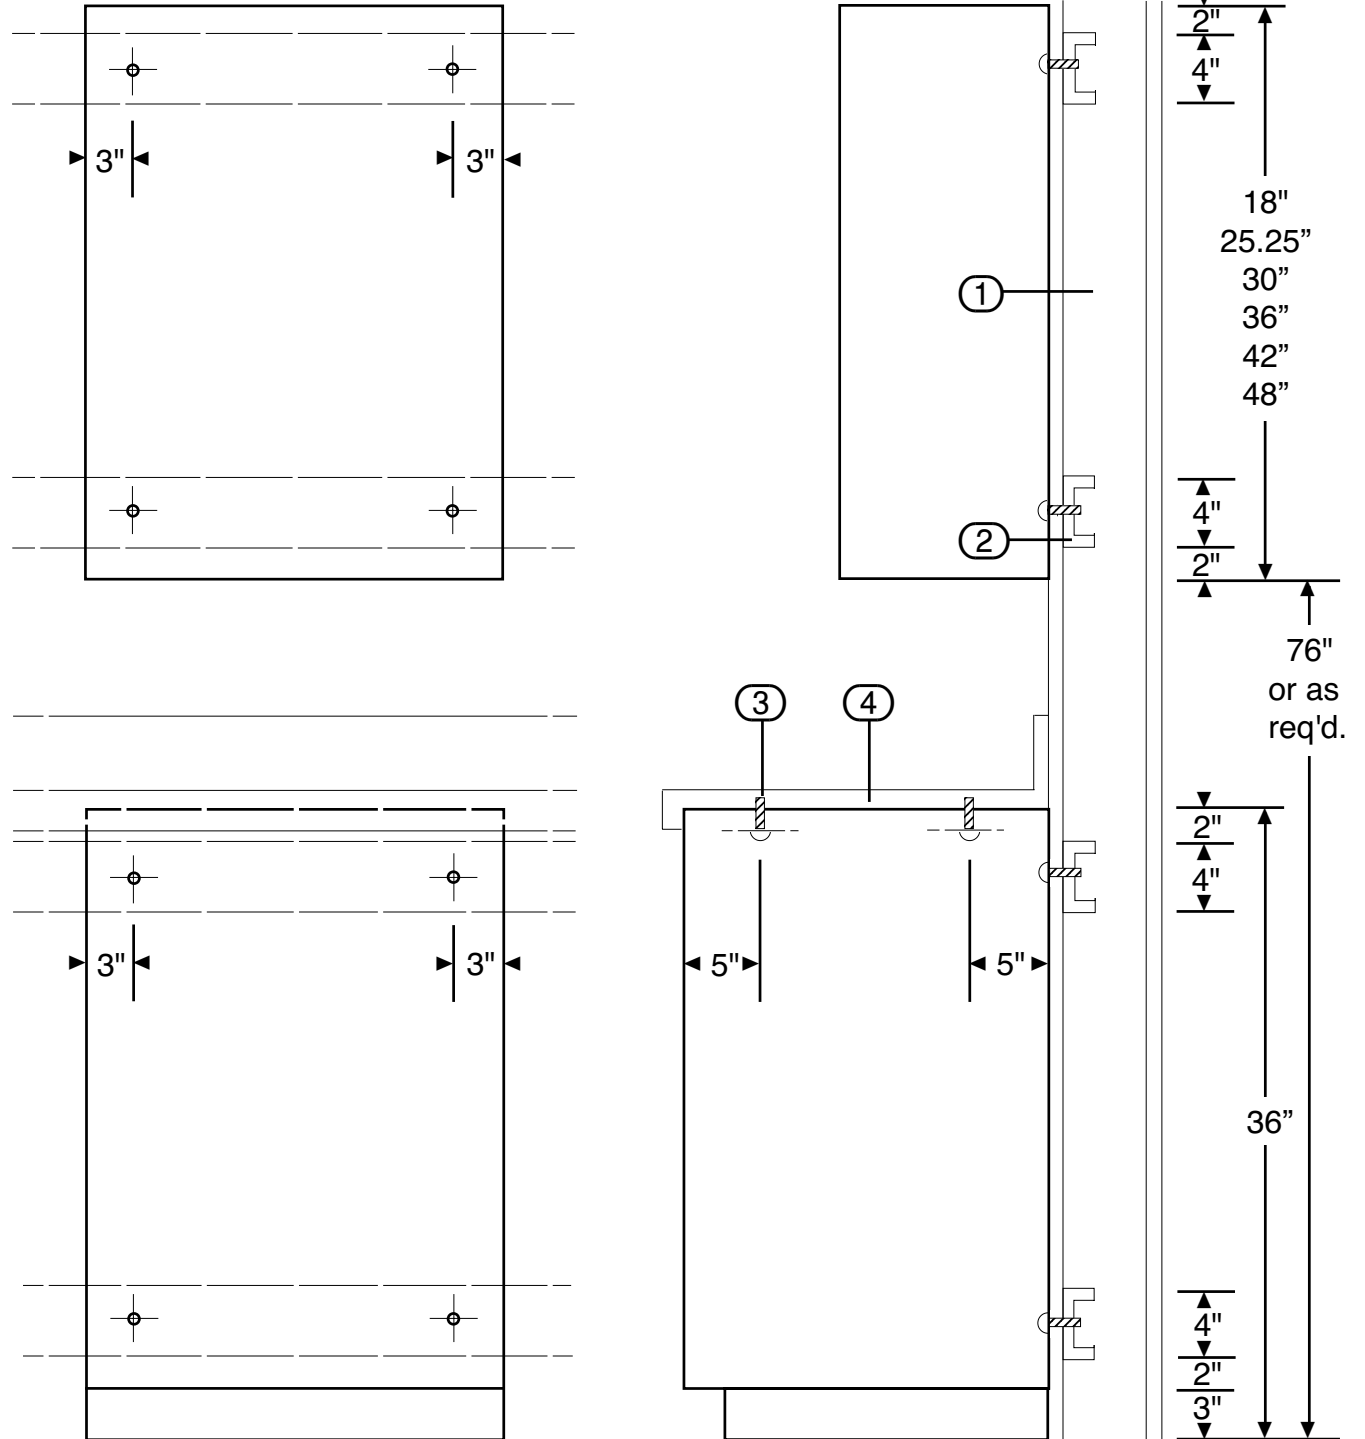

FRONT  
VIEW

A technical line drawing showing the side view of the stainless steel cabinet. It illustrates the depth of the cabinet and the internal structure. The top glass panel is shown with a gasket. Below it, the drawer is shown with ball bearing slides. The three shelves are shown with their adjustable supports, which are indicated by dashed lines. The back panel and internal bracing are also visible. The cabinet sits on a base with a toe space.

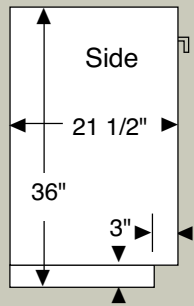

SIDE  
VIEW

# 7 Series Installation

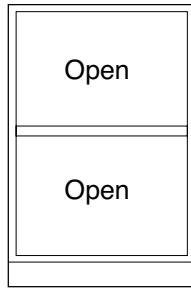

- (1) Metal or wood stud with wallboard.
- (2) Metal backing, 16 gauge by others.
- (3) No. 10 sheet metal or wood screw.
- (4) Counter top, any type, not included.
